*Quality, Accessible Healthcare.*

# A SOPHISTICATED AMBULATORY HEALTHCARE FACILITY.

NMPC Headquarters in Liverpool, NY

NMPC Northeast Facility in Fayetteville, NY

## About NORTH MEDICAL, P.C.

When Dr. A. John Merola opened the doors to North Medical, P.C. (NMPC) in 1971, he envisioned a facility where patients could access advanced health care services and the expertise of specialist's right in their own neighborhoods and communities. Today, NMPC serves the greater Syracuse area, delivering sophisticated ambulatory healthcare from two campuses in fast-growing suburban areas.

At NMPC, exceptional patient care is our primary goal. Whether you choose an opportunity in Family Practice, Urgent Care or one of our specialty areas, your talents will touch the lives of patients every day.

As a provider at NMPC, you can build a very successful medical practice. Our practice support infrastructure and economic model enable both new and experienced providers to focus on delivering patient care while benefitting from the resources of vibrant multi-specialty groups.

NMPC also offers physician assistants and nurses practitioners a dynamic environment where your knowledge and experience are valued, and you can continually refine your skills in partnership with highly credentialed physicians.

### Urgent Care

Patients do not always get sick during normal business hours. Sometimes their conditions cannot wait until morning, but yet they don't warrant a visit to the emergency room. That's where North Medical Urgent Care fits in. Our two facilities are open from 7AM to 11PM every day of the year, including holidays. Urgent Care sees over 60,000 patients a year from across the entire Central New York area.

Urgent Care is a dynamic and challenging work environment where you provide valuable, time-sensitive medical attention to a wide variety of patients every day. For some patients, you provide a critical link between the primary care physician or a specialist and the patient. For others, you might be the only medical professional they have seen in some time and become the catalyst for them to seek an ongoing relationship with a primary care physician. In many cases, you will be their first contact with NMPC and represent the "face" of our practice to the community. It is an exciting role that attracts individuals who thrive on variety and a fast-paced setting.

### Family Practice

The Family Physicians are the cornerstone of the practice. The primary care physician plays a crucial role in the lifelong health and wellness of the patient. We believe that patients benefit significantly from an ongoing relationship with a physician who is keenly aware of their entire medical picture.

NMPC is committed to offering our patients convenient hours and access to ancillary services and specialty practices within our campuses. Your patients can receive a significant percentage of their routine medical care right in the same facility. We offer state-of-the-art laboratory, radiology and CT/MR services in each of our two buildings. NMPC patients also benefit from the electronic health records, which allow connectivity between physicians, the diagnostic tests and our referring practices.

NMPC helps its physicians build a strong, diverse patient base that yields a steady appointment flow. Our clinical support team and administrative staff allow you to focus on the quality of medical care you deliver to patients. We have high expectations for our physicians, but offer an economic model that rewards exceptional performance.

### Orthopedics & Rehabilitation

Musculo-skeletal issues represent a high percentage of patients, and NMOR provides convenient access to orthopedic and pain management specialists.

NMOR is a general orthopedics practice whose patients present with a wide range of conditions. In addition, our specialists are highly regarded in the healthcare community for their level of experience and breadth of knowledge.

As the baby boomer generation enters retirement, we anticipate that this practice area will continue to grow rapidly. Pain management is in growing demand within the greater Syracuse area and NMPC is one of a small percentage of orthopedics practices with a dedicated pain management specialist.

As a specialty area within the practice, NMOR receives a high percentage of referrals from other NMPC providers. Our specialists work closely with the other practice areas in NMPC to create an integrated healthcare environment for our patients, and to bring the necessary expertise to handle even the most difficult cases.

## Practice Statistics

- One practice, 2 locations (Liverpool and Fayetteville)
- 5 clinical practice areas
- 316,000 patient visits per year
- 65+ providers and mid-level practitioners
- 500 clinical and administrative support staff
- 100% "Board Certified" in their specialties
- Onsite laboratory, full service radiology

“ North Medical, P.C. provides me with critical practice support and an economic model to build a successful medical practice that fits with my skills and interests.”

**James LoDolce, MD**  
- Northeast Medical Family Physicians

## A Message from Leadership

*Welcome to North Medical, P.C. At NMPC, we believe in putting patients first in all we do and recognize employees are our single greatest asset in achieving this mission. We strive to create an environment that encourages and rewards excellence and collaboration for the benefit of the patient. Our staff is among the most highly credentialed in the region.*

*As the largest private medical practice in the greater Syracuse area, we think you will find we have a lot to offer as a place to grow your practice. When you join NMPC, you become part of a community of practitioners and have access to a wide array of resources and ancillary services. NMPC has made significant investments in technology and facilities to ensure our providers can offer exceptional healthcare and bring it directly into our patients' communities.*

*We recognize that every provider joining our practice brings with him or her a set of experiences and expectations. Our model allows you to build your practice in a way that retains your unique talents as a medical professional yet contributes to the growth and sustainability of the practice as a whole. Access to our outstanding clinical team, ancillary services and practice management staff help alleviate the administrative burdens faced by solo practitioners and others in small medical groups.*

*NMPC has exciting plans for growth and service expansion. We continue to look for opportunities to deepen our relationships with patients and improve the breadth and quality of healthcare available to the suburban Syracuse area. Central New York is a great place to live and raise a family. North Medical, P.C. is a great place to build your medical practice.*

### The Women's Place

At The Women's Place, we are dedicated to serving the unique healthcare needs of women in a comfortable, relaxed setting. Providers in this practice area are focused on providing access to quality care for a woman's mind, body and spirit. They recognize that today's busy lifestyles are creating demand among women for convenient medical care that encompasses the needs of the total woman.

When the Women's Place opened its Fayetteville facility in 1998, it was the area's first totally comprehensive women's wellness center. The Women's Place offers healthcare services to women and girls of all ages. The multi-specialty practice allows them access to a family physician, gynecologist, and preventive medicine in one location. This includes diagnostic exams, such as pap smears, mammography, bone-density analysis, general x-ray, cardiac-stress testing, flexible sigmoidoscopy, minor surgical procedures, as well as routine physicals and preventive care.

### Living Proof Longevity Centre

Living Proof Longevity Centre is a unique medical service practice specializing in anti-aging and preventative medicine. Formed in 2000 by Dr. Mark McConn and Dr. Susan Merola-McConn, Living Proof offers a wide range of products and services that enable patients to become actively involved in managing the aging process. We believe that taking a practice approach can help patients lead healthy, active, disease-free lives.

Living Proof is different from other spas and medi-spas because every program is supervised by a physician and performed by a licensed medical professional. The doctors perform lasers, fillers, Botox and many other modalities associated with skin rejuvenation. In addition to routine women's health, we offer executive physicals, preventative medicine, bio-identical hormone therapies, and weight loss programs. This program is for individuals who wish to join us in a journey to health, vitality, growth and fulfillment.

Recently, a licensed aesthetician was added to the staff to enhance the scope of skin care and cosmetic services.

## SYRACUSE: CENTRAL NEW YORK'S CREATIVE CORE

According to the latest edition of the Places Rated Almanac, Syracuse ranks in the top 10% of Best Places to Live. Located in the geographic center of New York State, Syracuse is a scenic treasure amid rolling hills, tranquil lakes and picturesque forests. Our changing seasons produce colorful autumns, and winter snows transform our gently rolling hills into a perfect playground for winter sports enthusiasts. Our strategic location at the crossroads of New York State puts Syracuse within only five hours of nearly every major eastern metropolitan area, including New York City, Boston, Toronto, Washington D.C. and Philadelphia.

Our community boasts an impressive quality of life. Residents enjoy an abundance of natural resources, an impressive range of recreational and cultural amenities, a reasonable cost of living, a depth of educational opportunities and numerous quality services found in major metropolitan areas today.

### Did you know...

- Some of the best schools in the nation can be found in Syracuse and Central New York. The region boasts over 35 colleges and universities including Syracuse University, Cornell University, Colgate University and SUNY Upstate Medical University.
- The healthcare industry is thriving in Central New York. It is home to five world-class hospitals, including some of the country's top medical education and research activities and a new state-of-the-art Children's Hospital that is opening soon. With over 1,600 general and specialty physicians practicing in the area, you will find a vibrant community of peers in Syracuse.
- Syracuse has the fastest growing economy in Upstate New York. Our economy is being shaped by dynamic new companies and industry leaders in fields like green technology, renewable energy, medical technology, life sciences and information security.
- Cultural opportunities abound in Syracuse including an opera company, symphony, theaters, art museums and historical sites. The Finger Lakes, Adirondack Mountains, Niagara Falls, the historic Mohawk Valley and Capital Region are only a short drive away and make for a great day trip for the entire family.

### Career Opportunities

North Medical, P.C. is continually looking for qualified physicians and mid-levels in each of the practice areas. Employees receive a competitive compensation and benefits package including ongoing professional development and access to a wide range of practice support services. Malpractice insurance is also included.

Interested candidates should forward their credentials to:
