

# Living Proof Longevity Center

## *A Proactive Approach to the Aging Process*

Living Proof Longevity Centre is a unique medical service practice specializing in anti-aging and preventative medicine. Formed in 2000 by Dr. Mark McConnell and Dr. Susan Merola-McConn, Living Proof offers a wide range of products and services that enable patients to become actively involved in managing the aging process. According to Dr. Merola-McConn, This program is for the individuals who wish to join us in a journey to health, vitality, growth and fulfillment.”

In July, Living Proof became part of North Medical, P.C. and is located within The Women’s Place suite at the Northeast Medical Center in Fayetteville. Among the services offered by Living Proof are:

- Botox
- Restylane
- Sculptra
- Mesotherapy/Lipodissolve
- Weight Loss Programs
- Bioidentical Hormone Replacement Therapies
- Lunchtime/Weekend Peels
- Waxing
- Hydrafacials
- Microdermabrasion
- Laser Therapies for Acne Treatment
- Facial Rejuvenation, Hair Removal & Vein Removal
- Skin Care Products including Skin Medica, Kinerase, Dermamed & make up by Jane Iredale
- Cosmetic skincare consultations & make up application

Living Proof is different from other spas and medi-spas because every program is supervised by a physician and performed by a licensed medical professional. Living Proof is also able to offer clients primary care services like they would receive in a traditional family practice setting. Now that Living Proof has joined North Medical, P.C., clients can benefit from having greater access to a wider range of physicians and leading edge medical technology located within the practice.

*“We believe that taking a proactive approach to the aging process can help patients lead healthy, active, disease free lives.”*
